DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-7, drawn to recording a program with a program guide, classified in class 725, subclass 58.
 - II. Claims 8-11, drawn to recording a program with multiple devices, classified in class 725, subclass 141.
 - III. Claims 12-17, drawn to user requested video from a receiver, classified in class 725, subclass 100.
 - IV. Claims 18-20, drawn to select a video signal, classified in class 725, subclass 38.
 - V. Claims 21-24, 30-31 drawn to storing data and deleting data due to storage conditions, classified in class 725, subclass 142.
 - VI. Claims 25-29, drawn to simultaneously recording signals, classified in class 386, subclass 92.
 - VII. Claims 32-34, drawn to customizing the content to be displayed, classified in class 725, subclass 47.
 - VIII. Claims 35-37, drawn to fast, slow or stop reproducing, classified in class 386, subclass 68.

Art Unit: 2617

- IX. Claims 38-42, drawn to sequencing content, classified in class 715, subclass 723.
- X. Claims 43-49, drawn to a programmable apparatus, classified in class 386, subclass 83.

The inventions are distinct, each from the other because of the following reasons:

Inventions I, II, III, IV, V, VI, VII, VIII, IX and X are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct if they do not overlap in scope and are not obvious variants, and if it is shown that at least one subcombination is separately usable. In the instant case, subcombination II has separate utility such as issuing a command to record on a mass storage device while using a set top box, subcombination III has separate utility such as recording based on preview channel, subcombination IV has separate utility such as video editing of recording content, subcombination V has separate utility such as managing storage, subcombination VI has separate utility such as simultaneously watching and recording different signals, subcombination VII has separate utility such as archiving a playlist, subcombination VIII has separate utility such as looping operation based on trick mode data, subcombination IX has separate utility such as bookmarking content, subcombination X has separate utility such as a digital video recording of content. See MPEP § 806.05(d).

Because these inventions are independent or distinct for the reasons given above and have acquired a separate status in the art in view of their different classification, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the requirement be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

The election of an invention or species may be made with or without traverse. To reserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.

Should applicant traverse on the ground that the inventions or species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the inventions or species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
